Preface to the Sixth Edition (SIE)

xv

Preface to the Fifth Edition

xvii

1. Introduction to Software Project Management

1

- 1.1 Introduction 1
- 1.2 Why is Software Project Management Important? 1
- 1.3 What is a Project? 2
- 1.4 Software Projects versus Other Types of Project 4
- 1.5 Contract Management and Technical Project Management 4
- 1.6 Activities Covered by Software Project Management 4
- 1.7 Plans, Methods and Methodologies 7
- 1.8 Some Ways of Categorizing Software Projects 8
- 1.9 Project Charter 11
- 1.10 Stakeholders 12
- 1.11 Setting Objectives 13
- 1.12 The Business Case 14
- 1.13 Project Success and Failure 15
- 1.14 What is Management? 16
- 1.15 Management Control 18
- 1.16 Project Management Life Cycle 21
- 1.17 Traditional *versus* Modern Project Management Practices 23
- Conclusion 25
- Annex 1 Contents List for a Project Plan 25
- Further Exercises 26

2. Project Evaluation and Programme Management

31

- 2.1 Introduction 31

2.2	Business Case	32
2.3	Project Portfolio Management	34
2.4	Evaluation of Individual Projects	35
2.5	Cost-benefit Evaluation Techniques	37
2.6	Risk Evaluation	43
2.7	Programme Management	46
2.8	Managing the Allocation of Resources within Programmes	47
2.9	Strategic Programme Management	48
2.10	Creating a Programme	48
2.11	Aids to Programme Management	50
2.12	Some Reservations about Programme Management	52
2.13	Benefits Management	53
	Conclusion	54
	Further Exercises	55

3. An Overview of Project Planning

58

3.1	Introduction to Step Wise Project Planning	58
3.2	Step 0: Select Project	60
3.3	Step 1: Identify Project Scope and Objectives	62
3.4	Step 2: Identify Project Infrastructure	64
3.5	Step 3: Analyse Project Characteristics	66
3.6	Step 4: Identify Project Products and Activities	68
3.7	Step 5: Estimate Effort for Each Activity	73
3.8	Step 6: Identify Activity Risks	74
3.9	Step 7: Allocate Resources	75
3.10	Step 8: Review/Publicize Plan	77
3.11	Steps 9 and 10: Execute Plan/Lower Levels of Planning	78
	Conclusion	78
	Further Exercises	79

4. Selection of an Appropriate Project Approach

81

4.1	Introduction	81
4.2	Build or Buy?	83
4.3	Choosing Methodologies and Technologies	84
4.4	Software Processes and Process Models	88
4.5	Choice of Process Models	88
4.6	Structure <i>versus</i> Speed of Delivery	88
4.7	The Waterfall Model	89
4.8	The Spiral Model	91
4.9	Software Prototyping	92
4.10	Other Ways of Categorizing Prototypes	93
4.11	Incremental Delivery	95
4.12	Atern/Dynamic Systems Development Method	98
4.13	Rapid Application Development	100
4.14	Agile Methods	101
4.15	Extreme Programming (XP)	103
4.16	Scrum	106

4.17	Lean Software Development	108
4.18	Managing Iterative Processes	110
4.19	Selecting the Most Appropriate Process Model	111
	<i>Conclusion</i>	112
	<i>Further Exercises</i>	112
5.	Software Effort Estimation	117
5.1	Introduction	117
5.2	Where are the Estimates Done?	119
5.3	Problems with Over- and Under-Estimates	120
5.4	The Basis for Software Estimating	121
5.5	Software Effort Estimation Techniques	124
5.6	Bottom-up Estimating	125
5.7	The Top-down Approach and Parametric Models	126
5.8	Expert Judgement	128
5.9	Estimating by Analogy	128
5.10	Albrecht Function Point Analysis	129
5.11	Function Points Mark II	131
5.12	COSMIC Full Function Points	133
5.13	COCOMO II: A Parametric Productivity Model	135
5.14	Cost Estimation	141
5.15	Staffing Pattern	141
5.16	Effect of Schedule Compression	143
5.17	Capers Jones Estimating Rules of Thumb	144
	<i>Conclusion</i>	146
	<i>Further Exercises</i>	146
6.	Activity Planning	155
6.1	Introduction	155
6.2	Objectives of Activity Planning	156
6.3	When to Plan	157
6.4	Project Schedules	157
6.5	Projects and Activities	157
6.6	Sequencing and Scheduling Activities	163
6.7	Network Planning Models	164
6.8	Formulating a Network Model	164
6.9	Adding the Time Dimension	168
6.10	The Forward Pass	169
6.11	Backward Pass	171
6.12	Identifying the Critical Path	172
6.13	Activity Float	174
6.14	Shortening the Project Duration	174
6.15	Identifying Critical Activities	175
6.16	Activity-on-Arrow Networks	175
	<i>Conclusion</i>	183
	<i>Further Exercises</i>	183

7. Risk Management

- 7.1 Introduction 188
- 7.2 Risk 189
- 7.3 Categories of Risk 190
- 7.4 Risk Management Approaches 192
- 7.5 A Framework for Dealing with Risk 192
- 7.6 Risk Identification 193
- 7.7 Risk Assessment 194
- 7.8 Risk Planning 197
- 7.9 Risk Management 199
- 7.10 Evaluating Risks to the Schedule 200
- 7.11 Boehm's Top 10 Risks and Counter Measures 202
- 7.12 Applying the PERT Technique 203
- 7.13 Monte Carlo Simulation 208
- 7.14 Critical Chain Concepts 209
- Conclusion 214
- Further Exercises 215

219

8. Resource Allocation

- 8.1 Introduction 219
- 8.2 Nature of Resources 220
- 8.3 Identifying Resource Requirements 221
- 8.4 Scheduling Resources 224
- 8.5 Creating Critical Paths 228
- 8.6 Counting the Cost 228
- 8.7 Being Specific 228
- 8.8 Publishing the Resource Schedule 230
- 8.9 Cost Schedules 232
- 8.10 Scheduling Sequence 233
- Conclusion 235
- Further Exercises 235

9. Monitoring and Control

- 9.1 Introduction 238
- 9.2 Creating the Framework 238
- 9.3 Collecting the Data 241
- 9.4 Review 244
- 9.5 Visualizing Progress 247
- 9.6 Cost Monitoring 250
- 9.7 Earned Value Analysis 251
- 9.8 Prioritizing Monitoring 256
- 9.9 Getting the Project Back to Target 257
- 9.10 Change Control 259
- 9.11 Software Configuration Management (SCM) 261
- Conclusion 267
- Further Exercises 267

238

10. Managing Contracts	270
10.1 Introduction	270
10.2 Types of Contract	271
10.3 Stages in Contract Placement	276
10.4 Typical Terms of a Contract	280
10.5 Contract Management	283
10.6 Acceptance	283
Conclusion	284
Further Exercises	284
11. Managing People in Software Environments	286
11.1 Introduction	286
11.2 Understanding Behaviour	288
11.3 Organizational Behaviour: A Background	289
11.4 Selecting the Right Person for the Job	290
11.5 Instruction in the Best Methods	292
11.6 Motivation	292
11.7 The Oldham–Hackman Job Characteristics Model	295
11.8 Stress	296
11.9 Stress Management	297
11.10 Health and Safety	297
11.11 Some Ethical and Professional Concerns	298
Conclusion	300
Further Exercises	300
12. Working in Teams	303
12.1 Introduction	303
12.2 Becoming a Team	304
12.3 Decision Making	307
12.4 Organization and Team Structures	312
12.5 Coordination Dependencies	318
12.6 Dispersed and Virtual Teams	319
12.7 Communication Genres	321
12.8 Communication Plans	323
12.9 Leadership	323
Conclusion	325
Further Exercises	326
13. Software Quality	327
13.1 Introduction	327
13.2 The Place of Software Quality in Project Planning	328
13.3 Importance of Software Quality	329
13.4 Defining Software Quality	329
13.5 Software Quality Models	331
13.6 ISO 9126	333
13.7 Product and Process Metrics	339
13.8 Product versus Process Quality Management	339

xiv Detailed Table of Contents

13.9	Quality Management Systems	341	
13.10	Process Capability Models	343	
13.11	Techniques to Help Enhance Software Quality	353	
13.12	Testing	357	
13.13	Software Reliability	363	
13.14	Quality Plans	367	
	Conclusion	368	
	Further Exercises	368	
14.	Project Closeout		374
14.1	Introduction	374	
14.2	Reasons for Project Closure	375	
14.3	Project Closure Process	377	
14.4	Performing a Financial Closure	378	
14.5	Project Closeout Report	380	
	Conclusion	381	
	Exercise	382	
	Appendix A: PRINCE2—An Overview		383
	Appendix B: Project Management Tools		394
	Appendix C: Answer Pointers		397
	Further Reading		436
	Index		440
